# WHY WARE

With Ware, autonomous drones capture images of the inventory in your facility.

## ELIMINATE CYCLE COUNTS WITH AUTONOMOUS DRONES

Ware combines the most innovative drones with our powerful software to deliver accurate inventory reports straight into your WMS.

Save money every month. The average Ware customer sees a payback period of fewer than 24 months.

## YOUR ENTIRE FACILITY IS AT YOUR FINGERTIPS.

The era of lacklustre, twice-yearly full coverage is over. Scan your entire warehouse as often as you need and refer back to the images whenever you want

**99%+ Accuracy**

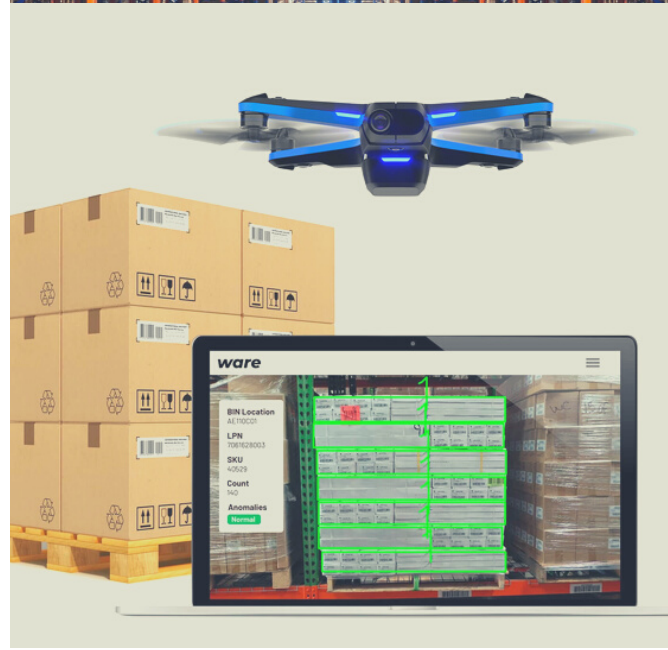

**Integration is a snap**

- Deploy Ware 100% remotely
- No additional infrastructure
- Finished in days, not months

# FORESIGHT.AI

USING AI TO NAVIGATE IN THE  
WORLD AUTONOMOUSLY,  
SAFELY AND NATURALLY.

We are providing you with expertise in artificial intelligence and robotics. Foresight AI is building a global-scale data and intelligence platform for autonomous vehicles and other mobile robots.

We immerse AI into a training academy, where they navigate in a semantic 3D environment and learn from real-world scenarios to help capture timely and relevant data.

**Ware.ai empower mobile robots with accurate, semantic, dynamic, 3D data and real human intelligence.**

By adding ware.ai to any of your security technologies like drones, robots, and security cameras, you can train and run multiple scenarios and train your devices faster for better results, insights and reporting.
