

SECURITY ROBOTS

COBALT

PEOPLE AND ROBOTS WORKING TOGETHER TO MAKE YOUR SPACES MORE **SAFE, SECURE, AND PRODUCTIVE**

WHY COBALT

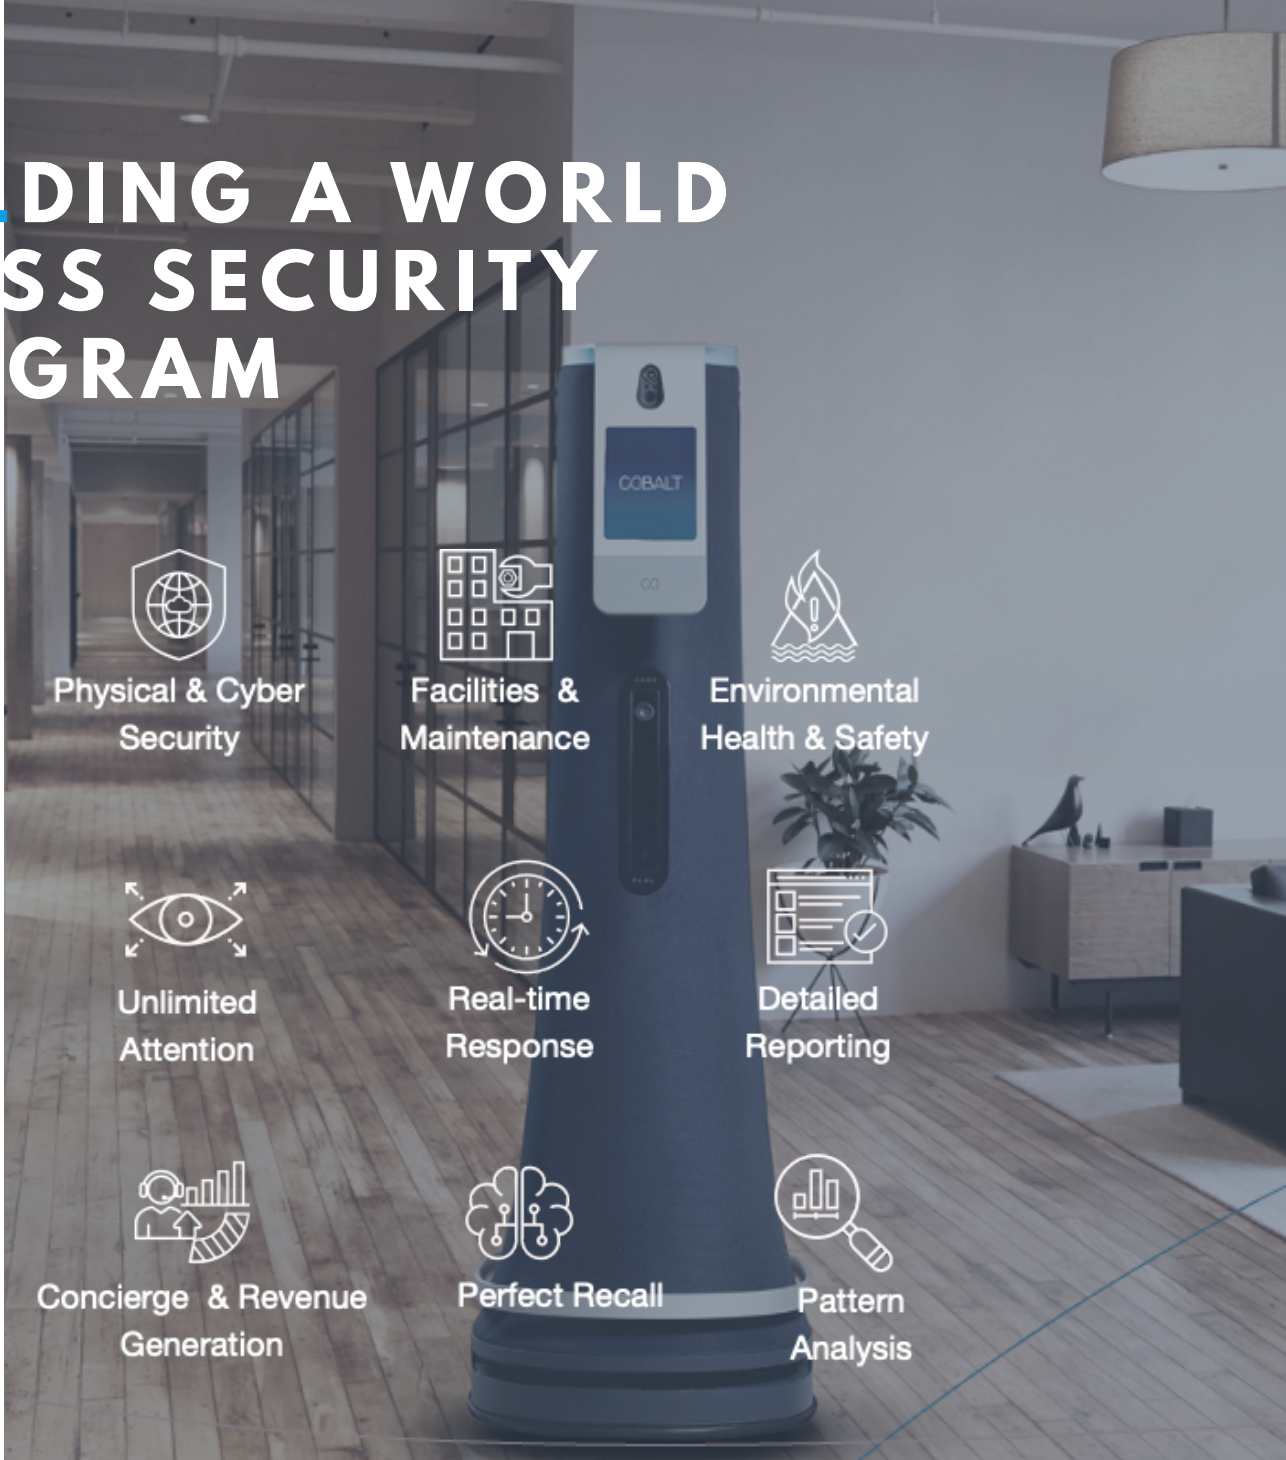

**COBALT PROVIDES BETTER
OBSERVATION AND REPORTING
THAN HUMAN GUARDS AT A
LOWER COST**

Cobalt Robots possess unlimited attention, perfect recall, and real-time human response. By combining this with consistent, detailed reporting, trend analysis will allow your Organisation to uncover security/risk gaps, drive behavioural change and provide data to make meaningful business decisions

- 1.Security, Health, Safety and Environment
- 2.Situationally aware
- 3.Reduce liability and lower cost
- 4.Insurance savings
- 5.Live 24/7 support

**WORKING TOGETHER TO
PROVIDE CLIENTS WITH
INTEGRATED SOVEREIGN
SOLUTIONS**

BUILDING A WORLD CLASS SECURITY PROGRAM

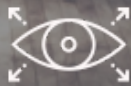

Physical & Cyber Security

Facilities & Maintenance

Environmental Health & Safety

Unlimited Attention

Real-time Response

Detailed Reporting

Concierge & Revenue Generation

Perfect Recall

Pattern Analysis

REAL WORLD SCENARIOS

A door to a restricted entryway was left open. The Cobalt robot alerted the Specialists and then remained by the entryway until the issue was resolved.

An employee slipped and fell at night. The Specialist ensured they were not injured and notified facilities and HR teams of the incident. Had they been hurt, our Specialist would quickly call 911.

COBALT

Two employees were spotted carrying a large object from the building. Alerted by the robot, the Specialist directed it to approach them, and determined that it was a harmless situation.

An individual was detected in a building after hours. The Specialist quickly determined they were an intruder and escorted them out of the building.

MAKE YOUR SECURITY AND OPERATIONS MORE EFFECTIVE

More than 60 sensors

- 360-degree camera
- Thermal camera
- Depth camera
- Ultrasonic sensors
- LIDAR
- Environmental sensors

Interactive Features

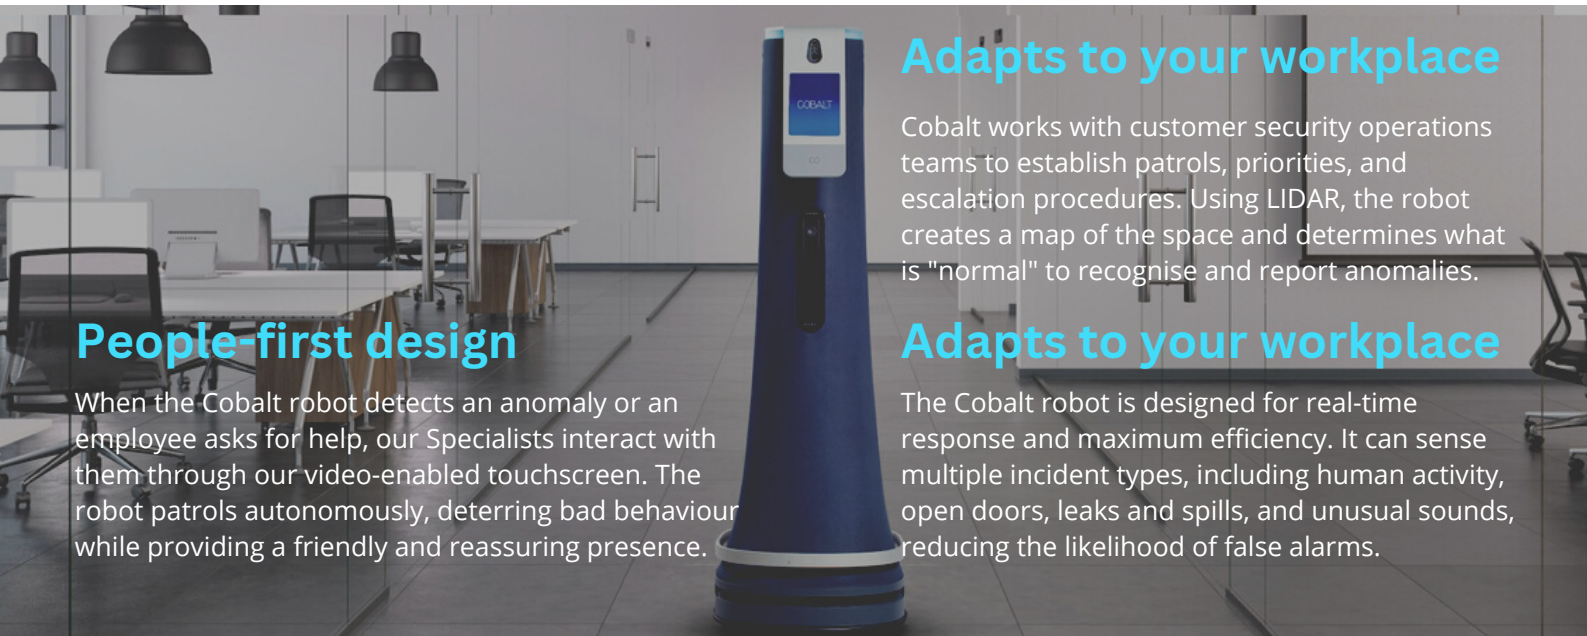

- 2-way video touchscreen
- Badge readers
- Mobile PA system and siren
- LED alert/signal ring

Superior experiences

- Real-time human interaction as needed
- Onboard GPU
- Best-in-class AI
- Autonomous docking
- Customer dashboard to monitor performance

User-friendly design

- Stands at 5'1"
- Tensile fabric cover
- Brushed aluminum details

People-first design

When the Cobalt robot detects an anomaly or an employee asks for help, our Specialists interact with them through our video-enabled touchscreen. The robot patrols autonomously, deterring bad behaviour while providing a friendly and reassuring presence.

Adapts to your workplace

Cobalt works with customer security operations teams to establish patrols, priorities, and escalation procedures. Using LIDAR, the robot creates a map of the space and determines what is "normal" to recognise and report anomalies.

Adapts to your workplace

The Cobalt robot is designed for real-time response and maximum efficiency. It can sense multiple incident types, including human activity, open doors, leaks and spills, and unusual sounds, reducing the likelihood of false alarms.

Advanced expertise and technology
